Presbyopia Correction Devices Market Revenue Opportunities and Various Manufacture Development Analysis from (2019 - 2025)

Posted on Wednesday, January 30, 2019

Los Angeles, CA -- (SBWire) -- 01/30/2019 -- In the recently published report, QY Research has provided a unique insight into the global Presbyopia Correction Devices market for the forecasted period of 7-years (2018-2025). The report has covered the significant aspects that are contributing to the growth of the global Presbyopia Correction Devices market. The primary objective of this report is to highlight the various key market dynamics such as drivers, trends, and restraints that are impacting the global Presbyopia Correction Devices market. This report has provided an indication to the readers about Presbyopia Correction Devices market's current status.

Presbyopia Correction Device general has two types: corneal inlay and scleral implants.
A corneal inlay (also called an intracorneal implant) is a device which is surgically implanted in the cornea of the eye as a treatment for presbyopia. Successful installation results in reducing dependence on reading glasses, so that the user can more easily engage in everyday tasks such as using a mobile phone, reading store shelf prices and working on a computer.

Corneal inlays are small, thin, and permeable. Typically one is implanted in the non-dominant eye.

Scleral implants are precision-molded from a clear plastic material; the clear implants are about the size of a grain of rice and are placed just below the surface of the white of your eye (called the sclera). The only one commercially available is VisAbility™ Micro-Insert System.

The classification of presbyopia correction device includes corneal inlays, scleral implants, and the proportion of corneal inlays in 2017 is about 82%.

Presbyopia correction device is widely used for presbyopia patients. And according to the patients' age, the device can be divided into age 40-50, age 50-65, age above 65. The most proportion of presbyopia correction device is 50-65 years old patients, and the proportion is about 53%.

EU is the largest consumption place, with a consumption market share nearly 46% in 2017. Following EU, United States is the second largest consumption place with the consumer market share of 32%.

The global Presbyopia Correction Devices market is valued at 12 million US$ in 2018 is expected to reach 38 million US$ by the end of 2025, growing at a CAGR of 18.0% during 2019-2025.
This report focuses on Presbyopia Correction Devices volume and value at the global level, regional level, and company level. From a global perspective, this report represents overall Presbyopia Correction Devices market size by analyzing historical data and future prospect. Regionally, this report focuses on several key regions: North America, Europe, China and Japan.

At the company level, this report focuses on the production capacity, ex-factory price, revenue, and market share for each manufacturer covered in this report.

The following manufacturers are covered:

AcuFocus

Revision Optics (Closed in Feb 2018)

Refocus

Presbia

...

Segment by Regions

North America

Europe

China

Japan

Segment by Type

Corneal Inlays

Scleral Implants

Segment by Application

Age 40-50

Age 50-65

Age above 65
