Dicyclopentadiene Market Segmented by Application, Geography Trends and Trade Overview Till 2025

Posted on Wednesday, May 29, 2019

Dicyclopentadiene Market research study stipulates a clear overview of the current market including the past and the projected future of market size concerning volume, technological advances, and economic elements in the market industry.

Los Angeles, CA -- (SBWire) -- 05/29/2019 -- Dicyclopentadiene (DCPD) is a chemical compound which is a dimer of cyclopentadiene (CPD). Dicyclopentadiene products are obtained during the cracking process of high petroleum fractions. It is majorly used in the manufacturing of resins. DCPD is increasingly used in manufacturing poly-DCPD, that is used in manufacturing truck body, buses, tractors, and big containers. As the automotive industry is in high demand in APAC, the poly-DCPD market will witness high growth. Also, the presence of many manufacturers and their capacity expansion will also boost the growth in the DCPD market in APAC.

The rising demand for bio-based EPDM is one of the key trends that will contribute to the market growth in the forthcoming years. The eco-friendly nature of the bio-based EPDM as it lowers greenhouse gas emission with lesser carbon footprint drives its popularity. The bio-based EPDM will witness stable growth in the coming years with the development of new grades and new applications. This will drive the growth of the DCPD market in the future. The DCPD market is characterized by the presence of numerous vendors and is competitive.

This market research report offers detailed information about the key areas the players currently focus on and the strategies they follow to sustain the market's competitive vendors. In terms of geographical regions, APAC will be the major revenue contributor of the DCPD market throughout the forecast period. The growth of the end-user industries such as construction and automotive will be a major factor driving the demand for DCPD in this region. The global Dicyclopentadiene market was xx million US$ in 2018 and is expected to xx million US$ by the end of 2025, growing at a CAGR of xx% between 2019 and 2025.

This report studies the Dicyclopentadiene market size (value and volume) by players, regions, product types and end industries, history data 2014-2018 and forecast data 2019-2025; This report also studies the global market competition landscape, market drivers and trends, opportunities and challenges, risks and entry barriers, sales channels, distributors and Porter's Five Forces Analysis.

Geographically, this report is segmented into several key regions, with sales, revenue, market share and growth Rate of Dicyclopentadiene in these regions, from 2014 to 2025, covering
North America (United States, Canada and Mexico)

Europe (Germany, UK, France, Italy, Russia and Turkey etc.)

Asia-Pacific (China, Japan, Korea, India, Australia, Indonesia, Thailand, Philippines, Malaysia and Vietnam)

South America (Brazil etc.)

Middle East and Africa (Egypt and GCC Countries)

The various contributors involved in the value chain of the product include manufacturers, suppliers, distributors, intermediaries, and customers. The key manufacturers in this market include

DowDuPont

Ningbo Jinhai Chenguang Chemical Corporation

NOVA Chemicals Corporation

Shandong Qilong Chemical

Sojitz Corporation

TEXMARK CHEMICALS

By the product type, the market is primarily split into

DCPD Resin Grade

DCPD UPR grade

DCPD High Purity

By the end users/application, this report covers the following segments

Unsaturated polyester resin (UPR)

Hydrocarbon resins

EPDM elastomers

Poly-DCPD

About QYResearch

QYResearch always pursues high product quality with the belief that quality is the soul of business. Through
years of effort and supports from huge number of customer supports, QYResearch consulting group has accumulated creative design methods on many high-quality markets investigation and research team with rich experience. Today, QYResearch has become the brand of quality assurance in consulting industry.
