Comprehensive Study of Telecom Power Systems Market 2019 in Depth Analysis on Growth, Trends, Key Players

Posted on Monday, September 30, 2019

Global Telecom Power Systems Market Shipment and Sales Forecast 2019-2024

Seattle, WA -- (SBWire) -- 09/30/2019 -- Telecom Power Systems consist of DC power systems, AC power systems and grounding system. The essential parts of a system are rectifiers, distribution unit and a power system controller. In direct current (DC) power systems, a rectifier converts alternating current (AC) to DC and provides the power necessary to charge batteries. In AC power systems, an inverter converts DC into uninterruptible AC. A power system controller monitors and controls the entire system and site power infrastructure, maximizes battery life, supports energy and cost savings, and informs the operator of maintenance needs. The power system can be expanded with renewable energy sources, which creates major energy and operating cost savings.

Telecom power systems is an important part of many telecom devices, which is used in the mobile telecom base stations, comprehensive access network site, data center. At currently, China is to accelerate the development of its high-speed broadband network and 4G LTE from 2015 and the major three communications operators also increase the investment of fixed assets of telecom industry. Many policies has released to stimulate the telecom industry, which will promote the demand for the telecom power systems.

Telecom Power Systems is a technology-intensive industry. Most of products are purchased through the bidding, which need high request to the provides, include the technology, cost, service and so on. With the development in production and technology, Chinese communications operators gradually shift to the domestic manufacturers. Many provides had a rapid growth through the bidding, like Huawei, which is the leader in the telecom power systems industry in China.

The worldwide market for Telecom Power Systems is expected to grow at a CAGR of roughly 5.3% over the next five years, will reach 6590 million US$ in 2024, from 4830 million US$ in 2019.

This report focuses on the Telecom Power Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Market Segment by Manufacturers, this report covers
HUAWEI
Delta
Emerson
Market Segment by Regions, regional analysis covers
North America (United States, Canada and Mexico)
Europe (Germany, France, UK, Russia and Italy)
Asia-Pacific (China, Japan, Korea, India and Southeast Asia)
South America (Brazil, Argentina, Colombia etc.)
Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria and South Africa)

Market Segment by Type, covers
Indoor telecom power system
Outdoor telecom power system

Market Segment by Applications, can be divided into
Macro BTS and outdoor distributed BTS
enterprise network, data center

The content of the study subjects, includes a total of 15 chapters:
Chapter 1, to describe Telecom Power Systems product scope, market overview, market opportunities, market driving force and market risks.
Chapter 2, to profile the top manufacturers of Telecom Power Systems, with price, sales, revenue and global market share of Telecom Power Systems in 2017 and 2018.
Chapter 3, the Telecom Power Systems competitive situation, sales, revenue and global market share of top manufacturers are analyzed emphatically by landscape contrast.
Chapter 4, the Telecom Power Systems breakdown data are shown at the regional level, to show the sales, revenue and growth by regions, from 2014 to 2019.
Chapter 5, 6, 7, 8 and 9, to break the sales data at the country level, with sales, revenue and market share for key countries in the world, from 2014 to 2019.
Chapter 10 and 11, to segment the sales by type and application, with sales market share and growth rate by type, application, from 2014 to 2019.
Chapter 12, Telecom Power Systems market forecast, by regions, type and application, with sales and revenue, from 2019 to 2024.
Chapter 13, 14 and 15, to describe Telecom Power Systems sales channel, distributors, customers, research findings and conclusion, appendix and data source.
