New York, NY -- (SBWire) -- 06/29/2020 --Disposable cups belong to the tableware family and disposable food packaging class. These cups can be either made of paper, plastic, or foam. For the foam material in disposable cups, expanded polystyrene is extensively used, whereas polypropylene is widely used in the making of plastic disposable cups. Disposable cups are single-used tableware essentials that are not only used in domestic or at functions and gatherings, but also increasingly used by restaurants and coffee shops, having their logos competently print on it. These cups are extensively used for carrying liquids, semi-liquids, and also solid consumables. They comprise significant portion of household and consumer waste. The demand for these types of tableware is increasing since they do not need to be washed after every use, maintains hygiene, brilliantly packaged that avoid spilling of liquids and semi-liquid beverages.

The ongoing COVID-19 pandemic is disturbing several productions, delivery and supply, and sales of essential consumer goods across the globe. With respect to disposable cups industry, the production as well as supply is halted and manufacturers and suppliers are rethinking on vital strategies to bring their businesses back to normal. Also, several branded coffee shops, such as Starbucks and other restaurants are planning to temporarily avoid refilling reusable coffee cups twice in order to maintain optimal hygiene and take preventive measures for the spread of virus.

Major Key Players of the Disposable Cups Market are:
Greiner Packaging (Greiner AG), Dart Container Corporation, Berry Global Inc., F Bender Limited, Go-Pak Group, Cosmoplast, James Cropper plc, Huhtamaki Foodservice E-A-O, Frugalpac Limited, and KAP CONES, among others

Growing environmental concerns related to the growing disposable waste is encouraging several manufacturers to promote the recycling of these cups. Materials that are disposed of can be collected and further sent for recycling and then be reused. For instance, in January 2020, LUIGI LAVAZZA SPA, an Italian manufacturer of coffee products launched biodegradable and recyclable cups for vending machines. These cups are manufactured using paper sourced from sustainably managed forests.

The increasing number of food canteens, industrial canteens, restaurants, coffee & tea shop, fast food outlets,
supermarkets, health clubs, and offices has significantly contributed to growth of the disposable cups market. Furthermore, the increasing number of quick-service restaurants globally has led to a strong demand for disposable food packaging products including disposable cups in the market. However, disposable cups produce a lot of waste. Hence several organizations are making conscious efforts to decrease waste generation from disposable products, thereby limiting market growth to a certain extent. For instance, a new café culture is becoming popular in San Francisco wherein a large number of coffee houses are replacing paper cups with glass jars and even rental mugs.
